

PANOBLU

Your Yacht, Your Journey, Your Story.

Panoblu SeaView is the premier 360° visible-light video system for superyachts, delivering continuous live 4K video from a single, elegantly integrated unit.

Every moment of your voyage unfolds in real time, from bow spray at speed to dolphins off the stern and harbour approaches at golden hour. SeaView captures it all simultaneously, from every direction. When you

want to revisit the moment, full 4K panoramic video is available on demand, preserving stunning sunsets, jaw-dropping vistas, and landfalls in extraordinary detail.

Beyond the experience, SeaView enhances vessel operations. Complete 360° situational awareness supports the bridge team, while onboard security is covered from a single unit, replacing multiple traditional cameras.

360°

360° Panoramic Imaging

Captures every detail of your voyage in stunning 4k video.

Secure Onboard Storage

All securely stored on board with full access control.
